

## Rotating Equipment Repairs

Rudi Kovacko & Associates and our partner ITT Ontario Pro are equipped and trained to perform all your pump and rotating equipment repairs. Our ISO 9001 Certified PRO Services® Centers have the experience and expertise not only to repair your equipment but offer upgrades, resulting in extended run times and reduced costs to our customers. Our goal is to reduce the cost of ownership, improve reliability, and increase profitability for our customers - "Extend Equipment Life."

Individuals charged with the important responsibility of keeping the plant up and the process running efficiently benefit from PRO Services® Repair. PRO Repair technicians repair ALL brands of pumps and rotating equipment:

Barrel Pumps	Circulating Water Pumps	Vertical Pumps
Vacuum Pumps	Babbitted Bearings	Gear Boxes
Mixers	Blowers	Compressors
Centrifuges	Agitators	Fans

### Turbines

- Reducing your cost of ownership and extending equipment life.
- No need to source different product specialists depending on the equipment requiring repair.

Mode of Failure analysis of the equipment can sometimes determine if the failure is caused by typical machinery failure or by system related issues such as cavitation, recirculation, dry running, misalignment, critical speed, etc. When identified, these systems issues can be corrected, and the equipment will have a longer MTBF (Mean Time Between Failure).

When you require repair assistance for your equipment call us:
